

SEMIANNUAL PROGRESS REPORT

October 2020 - March 2021 | Honduras

SUMMARY

In November 2020, hurricanes Eta and lota swept across northern Honduras. More than 2 million people, with lives already shattered by the effects of COVID-19, faced massive destruction to homes, infrastructure, crops, and livelihoods. Thankfully, smallholder farmers (producers) participating in World Vision's THRIVE (Transforming Household Resilience in Vulnerable Environments) project were prepared, executing a plan to reduce disaster risks and reactivate agricultural activity to help rebuild communities.

In the first half of fiscal year 2021, the THRIVE project also made possible:

 32 grain banks located in key areas in the towns of San Marcos and Florida. The banks were established in collaboration with the World Vision Honduras MANA Project and will help to ensure food security in hurricane-affected communities. compared with the previous sixmonth period. Farmers participated in Savings for Transformation where they saved money and contributed to loan and social funds, which help families in need.

- Training of 367 producer groups in Citizen Voice and Action (CVA).
 Participants then advocated for the provision of 12 latrines and six homes for vulnerable families. CVA promotes engagement between communities and governments to improve social services.
- Training for farmers to care for the environment and sustainably manage natural resources, resulting in 6,655 acres of land farmed with soil and water conservation techniques (a 146% increase from FY20) and nurture of 400,000 forest trees.
- Access to formal markets for 2,758 farmers, generating \$9,426,306 in income (mostly from coffee sales).

In the El Pacayal community in Honduras, children can enjoy school because their parents' farms help pay for their education. Through THRIVE, smallholder farmers access resources and learn new skills to produce high-yield crops, which in turn supply local markets and provide increased income for producers.

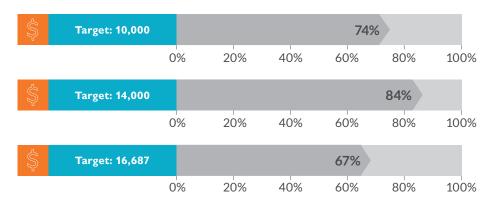

• Increased social funds by 43%

PROGRESS ON CORE ACTIVITIES (LIFE OF PROJECT: FY17-FY23)

7,449 farmers using improved tools and practices

11,701 savings group members

11,209 acres farmed with soil and water conservation techniques

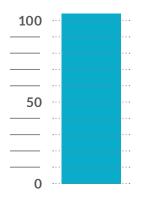

KEY LEARNINGS

- THRIVE provides young producers the opportunity to attend field schools, helping to strengthen their capacities in improved agricultural practices and promote leadership in their communities. "From a very young age, my brothers and I had to support my mother to generate income to support our family," said Cristian Quintanilla, 19. "[Now], I am part of and lead the THRIVE field school training for our community, strengthening economic income, improving food security, and integrating and forming values." To date, 52 youth participants (35% women) have completed field training through THRIVE.
- Through cellphone messages, 5,000 farmers now can be alerted to national emergencies and climate problems via AutoSEND, our early warning system.

LIFE-OF-PROJECT UPDATE (FY17-FY23)

Goal

14,000 farmers empowered to sustainably provide for 40,000 children by improving household resilience and increasing incomes.

Actual

17,020 farmers have begun their journey to sustainably provide for 59,224 household members (including 37,050 children) by improving household resilience and increasing incomes. While greater than our original goal, we look forward to completing the journey with this larger group.

PLANS FOR THE NEXT SIX MONTHS

In the second half of FY21, the THRIVE project will continue to support the growth and independence of smallholder farmers. We plan to (1) provide specialized assistance to producers of coffee as well as beans and other vegetables; (2) link producers to formal markets, promoting entry into the Walmart supermarket chain; and (3) promote savings for emergencies.

"I managed to implement a greenhouse with a capacity of 20,000 seedlings. Together, with the support of my father, we produce our own plants. I provide a service to other producers who seek me [for] seedlings because they prefer very good quality. I will continue to acquire knowledge in agriculture in the [THRIVE] training to have a clear, more developed mind and increase my income.

"I am grateful to World Vision for showing me the way, and strengthening my Christian knowledge and values."

> –Ever Alexander García, 34, Ocotepeque, Honduras

The work of their hands brings them

reward.

THANK YOU

World Vision

When you support THRIVE, you help Honduran families build successful and resilient businesses, so they can begin to move out of extreme poverty and into their God-given potential. You also help vulnerable children and their families to recover economically from major disasters. Thank you for partnering with World Vision in God's work and in making a difference in Honduras.
