

# COMMUNITY ENGAGEMENT PROJECT - ANALYSIS

Steps:

1. Explain the problem or material need
2. What economic solutions have we identified so far?
  - a. What's already happening?
  - b. What's most promising?
  - c. What might be being missed?
  - d. How can we participate?
3. What's our next step?

## Economic Solutions

Consider the following:

- What is the group you interviewed doing to address the problem?
- Are there areas of concern about the work currently being done? Is any harm being done?
- Is the nature of the work "relief", "rehabilitation", or "development"? Is this appropriate?
- Is there a way that the work we promote or produce could include a clear articulation of the gospel? Would that be possible or appropriate?
- Any lessons from the development work in your sponsored child's community?
- What is most promising about the direction our work is taking?

## COMMUNITY ENGAGEMENT PROJECT - ANALYSIS

### Next Steps

Consider the following:

- Can we think of a more holistic approach or sustainable approach to what's currently being attempted, or to what we've been thinking?
- What are ways that we can better help invite people into abundant life, not dependency?
- Any advocacy ideas sparked by the development program in your sponsored child's community?
- Is there a way that our class advocacy could amplify or promote the excellent work that we learned about?
- Consider - if we took the direction being proposed, how would we know if it was *working*?
