

I can know more deeply and have empathy for my sponsor child's relationship with water

I can see this relationship as one way I can grow richer and restore brokenness.

Checklist:

Where does my global neighbor get his/her water? What are the different things he/she uses it for?

Is the water clean?

Who else in the family uses this water?

How does this water meet his/her needs?

What is restored about his/her relationship with water?

What is broken about his/her relationship with water?

How does he/she use water the same as me?

How does he/she use water different than me?....
