

Students can use this leaf template to design their gratitude leaf for what they are thankful for (related to how their physical needs are met). These leaves could be cut out in advance or students could design their leaf and then cut it out. Add these cut leaves to the visual board display. Students can also design their own leaves and cut them out. Note The tree trunk can also be printed for the visual board display (only one is needed for the class, not one per student. Students will be adding their leaves to the same tree trunk).*

**One gives freely, yet grows all the richer;
another withholds what he should give
and only suffers want.
-Proverbs 11:24**
