Water Security & Resilience

Across East Africa, water security and resilience efforts help to address the underlying causes of recurring crises and chronic vulnerability.

Through the Resilient Arid Lands Partnership for Integrated Development (RAPID), a USAID funded partnership with the Millennium Water Alliance in Kenya, World Vision has contributed to building and strengthening community resilience to climate change in arid and semi-arid lands through improved water resources management, livestock, rangeland management, and business management.

The program is unique in that it connects county leaders, NGOs and the private sector. With these key leaders in the same office, the partnership has created trust, better communication, and shared goals.

While the RAPIDs program is complete, East Africa continues to strengthen its work in resilience through initiatives like World Vision Ethiopia's climate resilient water supply and sanitation and hygiene program in drought-prone areas.
