

# TIPPY TAPS

## WHAT DO YOU DO?

Sometimes when you're camping or in the bush, there's nowhere to wash your hands. What do you do?

---

---

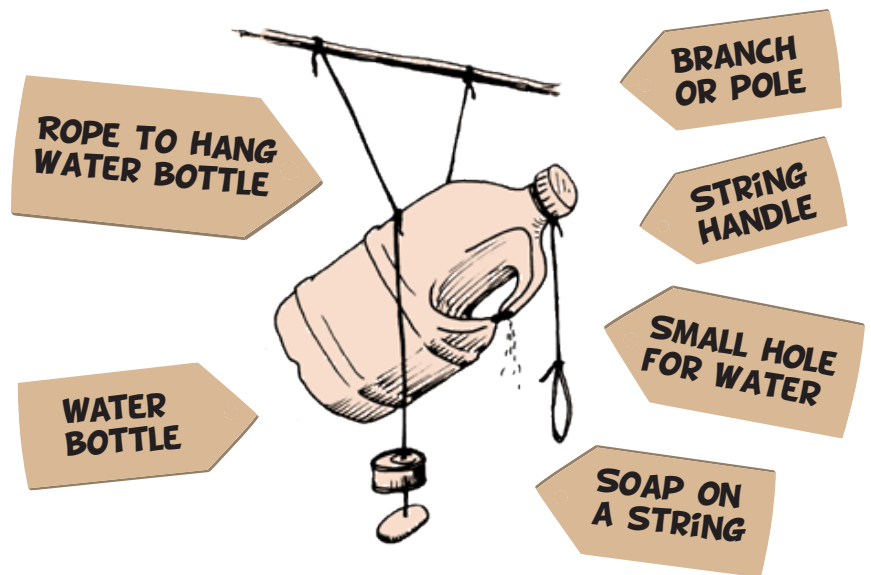

Some Worldbuddies face this problem every day because they don't have water pipes or taps in their homes. Here's one solution!

Maganga washes his hands using a tippy tap.

## TIPPY TAPS

A tippy tap is a simple way to wash your hands even if you don't have a tap. There are different designs, and you can use whatever materials you can find. All of them have a water bottle that is hanging from something. You tip the bottle using a rope handle or a foot control so you don't touch the handle with dirty hands. When the bottle tips, water sprinkles out of a small hole in the side. Then you wet the soap and wash your hands. It's so easy. The best thing is that you only need a small amount of water – just 40 ml is enough.

## MAKE YOUR OWN TIPPY TAP

Watch the [video clip](#) and talk about what makes a tippy tap hygienic.
